

# Scapa Electronics Adhesive Solutions

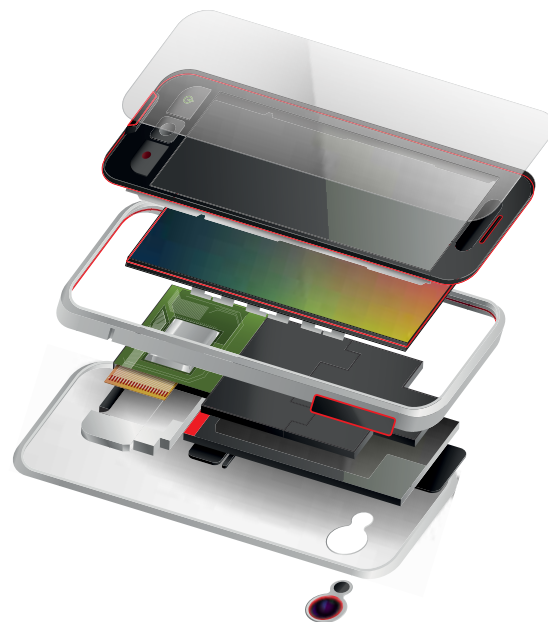

Consumer electronics such as home entertainment systems, video displays, laptops, tablets, smart phones and cameras continue to become thinner and lighter with the introduction of each new generation and innovation. Scapa's range of Acrylic Foam Tapes, Films and PU Foams are part of that innovation, providing precise bonding, sealing, cushioning and temperature control properties to ensure a lightweight, thin adhesive solution, while also allowing for the most sleek and stylish design possible. These Scapa capabilities are also utilized in electronic devices that control the medical, telecommunications, transportation, alternative energy and other emerging industrial sectors.

## Consumer Electronics Portfolio:

- Acrylic Foams Tapes (AFT)
- Acrylic Foam Film Tapes (AFFT)
- Optically Clear Adhesives (OCA)
- Thermal Spreaders (Heat Sink)
- Thermal Conductive Tapes (TCT)
- Electrically Conductive Tapes (ECT)
- Electronic Conductive Adhesive Transfer Films (ECA)
- Wire Harness Wraps

## Key Applications:

- TV frame mounting / cushioning and impact dampening
- Corner protection on displays & decorative panel fixing
- Nameplate & Speaker mesh mounting
- Cable fixing
- Paint & finish masking
- Thermal management & Electromagnetic interference shielding
- Touch screen displays & Key pad lamination
- Flexible printed circuits mounting
