

Scapa Appliance Adhesive Solutions

Scapa offers appliance and HVAC system manufacturers an extensive portfolio of technical adhesive tapes, films and foams for the permanent or temporary assembly of appliances and components. Scapa partners with industry experts and continuously evaluates new engineering trends, offering its partners customized solutions that meet industry and OEM spec to provide the optimal solution for the application.

Incorporating Scapa tapes and adhesives into the manufacturing process increases assembly efficiency, reduces the use of fasteners and hardware and results in sleeker design, appearance and functionality.

Appliance and HVAC Portfolio:

- Acrylic Foam Tapes (AFT)
- PE Coated Cloth Tape
- Double Sided PE Foams
- Wire Harness Wraps
- Transfer Tapes
- Filament Tapes
- Protective Films
- High Temperature Masking Tapes
- Packing / Securing Tapes
- Butyl Sealants

Key Applications:

- Bonding of internal & external components
- Vibration damping
- Wire identification & harnessing
- Decorative trim & logo mounting
- Securing components during shipment
- Powder and thermal spray coating
- Display and electronics assemblies
