Skin Friendly

Turn-Key Solutions

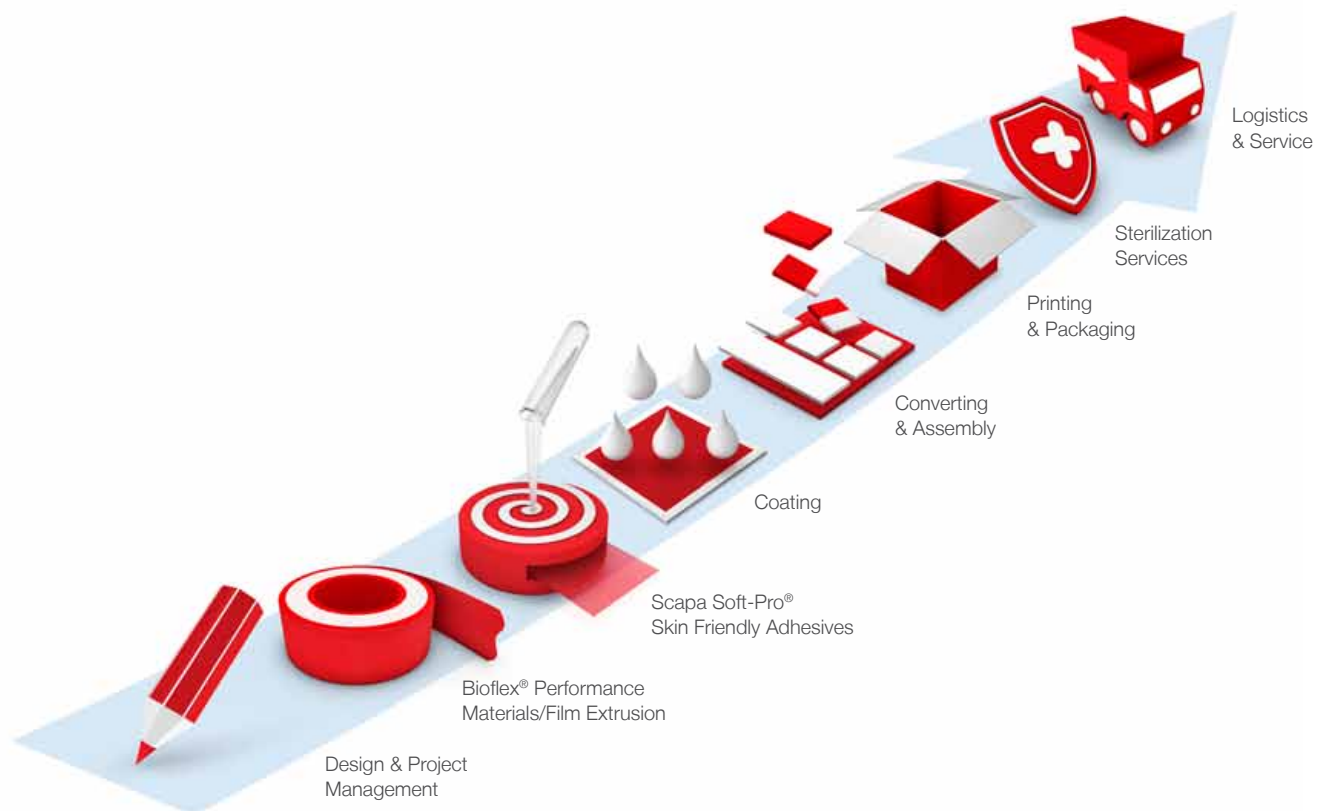

Scapa
Healthcare

Scapa Healthcare

Scapa is an experienced and trusted business-to-business provider to the global healthcare industry, delivering skin friendly turn-key solutions. We can support you through all aspects of product development from raw materials, coating, converting, sterilization, printing and packaging. Every solution is developed with end user comfort in mind.

Our expertise in product development means we are the ideal business partner in the healthcare industry. Our goal is to provide you with a reliable, trusted, regulated, safe and cost-effective partnership.

Scapa Group plc

Scapa is a worldwide leading manufacturer of bonding products and adhesive components for applications in the healthcare, electronics and industrial markets. Our worldwide service and supply chain capabilities place us in an excellent position to partner with global customers. As a market-led organization, our marketing and technical teams are continuously evaluating client needs, in order to meet their evolving requirements.

Why Scapa?

We care about quality

Quality is in everything we do, from our expert support and advice to concept design, through to full-scale production. You can feel confident that your products are manufactured to the highest level of quality and care.

Our high performing materials will make your products stand out

We manufacture and produce a comprehensive range of raw materials from our Bioflex® PU Films to a range of PU, PE and PVC Foams, non-wovens and fabrics.

We're experts in skin friendly adhesives

We can offer a wide range of adhesives and coatings, such as our skin friendly Scapa Soft-Pro® Silicone Gel range, speciality Acrylics and unique breathable Scapa Soft-Pro® Polyurethane Gel.

We can build your products ready to go

With our global converting capabilities we offer a range of fully validated precision equipment, operated by highly skilled teams with a depth and breadth of knowledge and experience. We can also offer high speed printing, packaging and sterilization services.

We're trusted worldwide

All of our worldwide converting facilities are registered to ISO9001 and ISO13485. We operate ISO 14644-1:1999 Class 7 (10,000) in Europe and ISO14644-1:1999 Class 8 (100,000) clean rooms in the US. We also have three US sites that are registered with the FDA.

Turn-Key Solutions

Project Management

Working with our Sales Teams and Application Engineers, we offer a complete design and project management service, tailor-made to meet your needs.

Research & Development

With the goal to reduce lead-times and streamline the development process, our dedicated R&D sites give you access to expert scientists with a broad range of skills and knowledge. As an integrated and flexible extension of your project team, we can offer:

- Access to new ideas and innovation
- Reduced time to market and better management of risks
- Customized solutions, development of differentiated products
- Cost reductions and service improvements

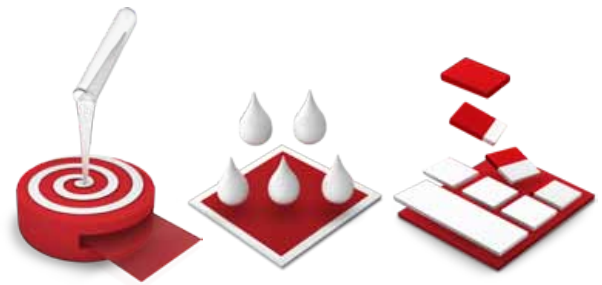

Bioflex[®] Performance Materials

We manufacture and produce a comprehensive range of Bioflex[®] performance materials from our high performing Polyurethane Films to a range of Polyurethane, Polyethylene and PVC Foams as well as Non-Wovens and Hydrocolloids. We can supply both coated and uncoated products.

Create.

Turn-Key Solutions

Adhesive Mixing and Coating

We are global experts in producing and coating high quality adhesives, and can help you define the requirements that best meet your application needs.

We can offer:

- Silicone Gel
- Polyurethane Gel
- Acrylic
- Rubber

These can be applied to a wide range of substrates and coated in a variety of ways, including pattern coatings.

Converting & Assembly

With our global converting capabilities, we can offer a range of fully validated precision equipment, operated by highly skilled teams with a depth and breadth of knowledge and experience. All of our worldwide converting facilities are registered to ISO9001/9002 and EN46001/EN46002 standards. We operate ISO 14644-1:1999 Class 7 (10,000) in Europe and ISO14644-1:1999 Class 8 (100,000) clean rooms in the US.

Our converting capabilities include:

- Precision rotary die cutting
- Multi-layer laminating
- Narrow-width slitting
- Multi-island placement
- High-speed, tight-tolerance manufacturing

Deliver.

Turn-Key Solutions

We can also provide high speed printing, packaging and sterilization services. We are an FDA registered medical device and pharmaceutical re-packager and re-labeler.

Our printing capabilities include:

- Flexographic printing capabilities from one to eight colors
- Print repeats up to 24"
- Full graphic design, art preparation and support
- Custom labels for every application
- Tag and label narrow web flexography
- Advanced web tension management
- Superior drying and curing systems

Our packaging capabilities include:

- Manual & Automated In-Line and Off-Line packaging
- Automated carton and insert systems
- Multiple Packaging Materials
- Fin-Seal, Bagging, Wrapping
- Form-Fill-Seal
- Pre-formed pouches
- Pick and place capabilities
- Circle packing lines

Sterilization, Logistics & Service

We provide a complete solution for sterilization of products, incorporating Gamma and Ethylene Oxide sterilization. Our services are tightly integrated and can be customized to suit your needs. Additional value added services such as laboratory batch testing, stability and accelerated aging are available as well.

We have a range of services that ensure uninterrupted supply of your products. We can work with your supply chain and help you plan and stage inventory where needed.

Advanced Wound Care.

Markets

We understand the clinical challenges faced when managing wounds. That's why we offer a broad range of materials and technologies designed to support and enhance the patient's quality of life. From controlling excess fluid to protecting fragile skin, we can help you design a product that's fit for purpose.

Key Applications & Products

Adhesives

- Silicone Gel
- Polyurethane Gel
- Acrylics
- Hydrocolloids

Foams

- Polyurethane Foam
- Polyethylene Foam
- PVC Foam

Breathable Films

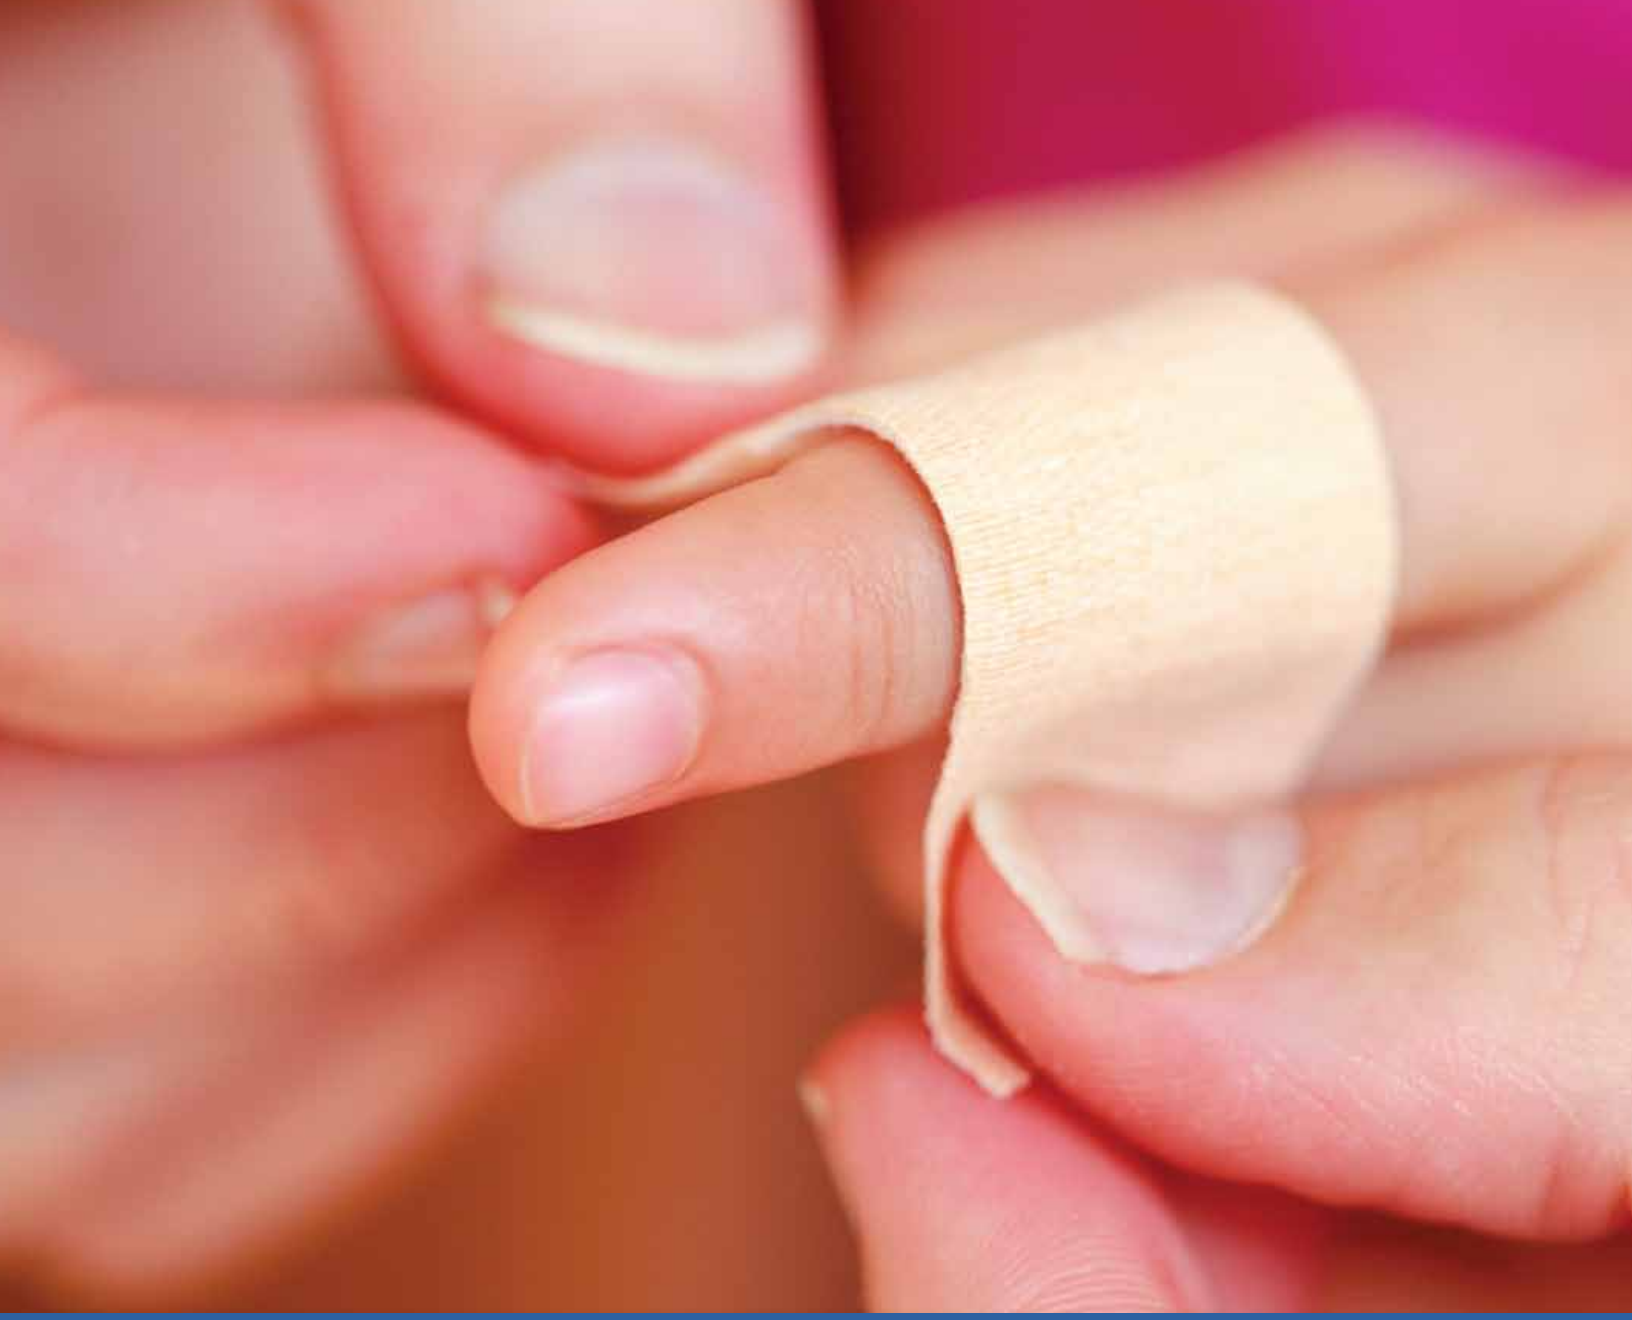

- Bioflex® Polyurethane Films

Membranes

- Film/Foam Backing Layers

Examples of Turn-Key products

- Adhesive Island Dressings
- Transparent Polyurethane Film Dressings
- Contact Layer Dressings
- Hydrocolloid Dressings
- Alginate Dressings
- Securement Tapes

Consumer Wellness.

Markets

With our full Turn-Key resources and global reach we are able to deliver unique products to the consumer market. Combining our innovation product pipeline and specialty performance materials, we can help you create the right product for your application.

Key applications

- Oral care
- Respiratory
- Dermatological
- Smoking cessation
- Ear care / Eye care
- Cold / flu treatment
- Allergy treatment
- Feminine hygiene
- Sleep aids
- Personal hygiene

Examples of Turn-Key products

- Nasal Dilators – respiratory aids
- Salicylic Bandages – wart removal
- First aid bandages – available as adhesive coated films, foams, non-woven or fabrics
- Private Label range – using our broad range of component materials and Turn-Key skills we're able to produce a range of generic consumer wellness products ready for your custom branding

Medical Devices.

Markets

Medical devices include a broad range of products varying in complexity and application. Our highly skilled sales engineers can guide you through our wide range of performance materials and adhesives to identify the solution that best suits your product's requirements. We can also help you bring your product to market with our full Turn-Key capabilities.

Within the Medical Device market we are primarily focused in four areas:

Monitoring

We understand that accurate monitoring is essential when treating patients. The interface and securement to the patient's skin cannot be compromised. This is why we are dedicated to providing a wide range of tape sensors that work in harmony with your monitoring devices.

- Pulse Oximetry
- Cardiac
- Glucose
- Blood pressure
- External defibrillators
- Sleep apnea
- Temperature

Fixation

We have the expertise and resources to produce a wide range of medical device fixatives and securements, including our 'Skin Friendly' range of adhesives.

- Foley Catheters
- Intravascular (IV) Cannulas
- Nasal Lines and Tubes products
- Eye Patch Dressings
- Epidural Catheters
- Endotracheal (ET) Tubes

Medical Devices.

Markets

Diagnostics

We are able to produce reliable and accurate multi-layered diagnostic and testing technology, with a choice of materials and adhesive coatings for use in a variety of applications.

- Blood Glucose
- Cholesterol Testing
- Urinary Tract Infections
- Pregnancy and Ovulation

Surgical

With our high performing Bioflex[®] Polyurethane Films combined with our medical grade adhesives we have an array of surgical solutions such as breathable Incision Drapes.

Drug Delivery.

Markets

Scapa Healthcare have been integral in the development of bonding solutions for innovative wearable bolus drug injectors that are set to revolutionise the drug delivery market. We see this evolving market as an ideal fit for our customised adhesive solutions, given the diversity of device fixation requirements in this space.

We understand the variety of fixation requirements of this type of device and the importance of a reliable bond to both the patient's skin and the device. Our leading expertise in skin-friendly adhesive solutions mean we can offer both the comfort level and reliable security required for this type of device, as well as a wear-times suited for short-term to the longest drug delivery durations.

We are able to provide solutions for continuous drug infusion, insulin monitoring and drug delivery applications.
