

# Reliable Protection for the insulation market

With over 20 years of manufacturing experience, Scapa is renowned as one of the key producers of PIB sheeting products for the insulation market.

With vast experience of approved use of our products in the thermal insulation market, we can now offer our high quality products with improved service levels.

With Scapa you also have the benefit of dealing with a leading global producer of adhesive technical tapes and foams which are distributed to the full range of Industrial, Automotive, Medical and Construction markets across Europe.

## Scapa PIB Sheeting

- **Local supply from the Self Amalgamating Centre of Manufacturing Excellence plant in Manchester UK**
- **Significant investment and focus to improve process efficiency and service levels**
- **Excellent technical expertise and support following Scapa's long established reputation and experience in the insulation market**
- **Consistently high quality products – produced to high specifications to meet end user requirements**
- **Additional support products including waterproof cloth tape, aluminum foil tapes and PVC tapes all manufactured by Scapa and available as part of our complete product offering to insulation market suppliers**

**PIB** Sheeting

# Scapa PIB Sheeting

Scapa PIB Sheeting is a solid sheet of polyisobutylene rubber produced in roll format and designed as a waterproof and weatherproof covering for thermal insulation on pipework and ventilation trunking.

PIB Sheeting Products	Colour	Thickness (mm)	Width (m)	Length (m)	Description
2582	Black	0.8	1	15	Chalked
2592	Black	0.8	1	15	Interleaved
2581	Black	0.5	1	25	Chalked

## Features and benefits

- Excellent resistance to abrasion and mechanical wear
- Water resistant – low water vapour permeability protects against moisture ingress
- Weather resistant
- Easy and flexible application on site by end users
- Cost and time efficient application
- Easy to cut to accommodate joints and valves
- Easy unwind – available in chalked form or interleaved
- Available in either standard high strength polythene sleeve packaging or premier high strength cardboard tube
- Non hazardous and environmentally friendly
