

Window manufacturers know that homeowners expectations are high where style and quality are concerned. Independently tested by the German Institute for Window Technology, **Scapa 5404** and **Scapa 5409**, allow manufacturers to apply plastic profiles to glass creating attractive, individual windows which are able to withstand the elements.

A reliable bond
that adds
style to
windows

Scapa 5404 and Scapa 5409 ensures:

- Reliable bonding for internal and external applications.
- A seamless finish for traditional or custom designed windows.
- A long lasting, maintenance free result.

Reduce manufacturing costs

- Quick and easy installation - no mechanical fixings are required.
- Immediate bonding - saves time as no curing or drying time is required.
- Reduce waste - available in logs, rolls, die cuts and spools to compliment every application.
